Research and Program Evaluation in Illinois: The Extent and Nature of Drug and Violent Crime in Illinois' Counties

A Profile of the Bureau County Criminal and Juvenile Justice Systems

This project was supported by Grant # 02-DB-MU-0017, awarded to the Illinois Criminal Justice Information Authority by the Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice. The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following programs, offices and bureaus: Bureau of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime. Points of view or opinions contained within this document are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Justice.

FOREWORD

The Illinois Criminal Justice Information Authority is a state agency created in 1983 to promote community safety by providing public policymakers, criminal justice professionals and others with information, tools and technology needed to make effective decisions that improve the quality of criminal justice in Illinois. The Authority provides an objective system-wide forum for identifying critical problems in criminal justice, developing coordinated and cost-effective strategies, and implementing and evaluating solutions to those problems. The specific powers and duties of the Authority are delineated in the Illinois Criminal Justice Information Act (Illinois Compiled Statutes, Ch. 20, Sec. 393/7). Two of the Authority's many responsibilities are serving as a clearinghouse of information and research on criminal justice and undertaking research studies to improve the administration of criminal justice.

Since 1989, the Authority's Research and Analysis Unit has received funds under the federal Anti-Drug Abuse Act of 1988 to document the extent and nature of drug and violent crime in Illinois and the criminal justice system's response to these offenses. As a result of these efforts, the Authority has amassed a large amount of data measuring the extent and nature of drug and violent crime in Illinois and the impact these crimes have had on the criminal justice system. To put this information into the hands of Illinois' criminal justice policymakers in a useful summary format, the Authority's Research and Analysis Unit has developed profiles of the criminal justice system for each county in Illinois. In 1994, the Illinois Criminal Justice Information Authority produced a series of reports detailing criminal justice system activity levels for each of Illinois' 102 counties. As a result of the positive response by local criminal justice officials, in 1996 the Authority updated and expanded the scope of these reports to reflect current criminal and juvenile justice activity. It is hoped that these 2004 updated reports will be as valuable, if not more, than the original versions. In addition to providing policymakers with an overview of activities across the components of the justice system in their county (law enforcement, courts and corrections), the profiles also provide perspective by including trends experienced in counties with similar population sizes.

While the data presented in this report are by no means inclusive of all indicators, they do provide a general overview of crime and the criminal justice system's response. In addition, these data are readily available and consistently defined through existing statewide data collection mechanisms.

The information presented in this profile has been provided to the Authority by a number of state agencies, specifically: the Illinois State Police, the Administrative Office of the Illinois Courts, the Illinois Department of Corrections, and the Illinois Department of Children and Family Services. The support and cooperation of these agencies and their staffs have helped make this report an informative and timely source of information on the activities of the criminal justice system in Illinois.

The Illinois Criminal Justice Information Authority's
Web-based clearinghouse of criminal justice data available at:

<http://www.icjia.state.il.us>

I. Introduction

Bureau County, located in northern Illinois, covers an area of 868 square miles and had a 2003 population of 35,221, according to estimates by the U.S. Department of Commerce's Bureau of the Census. Using these figures, Bureau County was the 94th smallest county in Illinois geographically, but 59th smallest in terms of population. Combining these two measures, Bureau County had the 40th smallest population density per square mile among Illinois' 102 counties.

As with the previous reports, information specific to Bureau County is presented in comparison with similar counties. To provide more useful comparisons, counties have been separated into four types; 1) Cook County, 2) Collar counties, 3) urban counties (outside of Cook and the Collar counties), and 4) rural counties. Because of its size, Cook County is compared to the rest of the state. The Collar counties are the five that border Cook County (DuPage, Lake, Kane, McHenry, and Will). Urban and rural counties are defined by whether or not they lay within a Metropolitan Statistical Area (MSA) (Appendix 1, page 24). Based on these definitions, there are 36 counties in Illinois that are part of a MSA (Cook, Collar, and urban counties) and 66 counties that are not part of a MSA (in other words, rural).

Recent changes to the standard definitions of MSAs have exposed the classification of several Illinois counties. The United States Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on the application of 2000 standards to 2000 decennial census data and were announced by OMB on June 6, 2003.

Standard definitions of metropolitan areas have changed over time. The term "metropolitan area" (MA) was adopted in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). More recently, the term "core based statistical area" (CBSA) became effective in 2000 and refers collectively to metropolitan and micropolitan statistical areas.

The 2000 standards require that each CBSA must contain at least one urban area of 10,000 or more population. Each metropolitan statistical area must have at least one urbanized area of 50,000 or more inhabitants. Each micropolitan statistical area must have at least one urban cluster of at least 10,000 but less than 50,000 population.

Under these standards, the county (or counties) in which at least 50 percent of the population resides within urban areas of 10,000 or more population, or that contain at least 5,000 people residing within a single urban area of 10,000 or more population, is identified as a "central county" (counties). Additional "outlying counties" are included in the CBSA if they meet specified requirements regarding residents commuting to or from the central counties.

Changes in the definitions of these statistical areas since the 1950 census have consisted chiefly of: 1) the recognition of new areas as they reached the minimum required city or urbanized area population, and 2) the addition of counties to existing areas due to new decennial census data. In some instances, formerly separate areas have been merged, components of an area have been transferred from one area to another, or components have been dropped from an area. The large majority of changes have taken place on the basis of decennial census data.

Because of these historical changes in geographic definitions, users must be cautious in comparing data for these statistical areas from different dates. For more information, contact the Population Distribution Branch at (301) 763-2419 (U. S. Census Bureau).

Based on these characteristics, Bureau County is one of Illinois' 66 rural counties. Throughout this report, the criminal justice activity trends experienced in Bureau County will be compared to those trends experienced in the other rural counties. This comparison will be realized through the calculation of rates for the activities being analyzed, with the number per 100,000 population the format for all the rates.

II. Law Enforcement Activities in Bureau County

One of the most commonly used indicators of the level of crime in a particular jurisdiction is the number of *Index offenses* reported to the police. There are eight separate offenses which constitute the Crime Index, including murder, criminal sexual assault, robbery, aggravated assault (violent Index offenses), burglary, theft, motor vehicle theft, and arson (property Index offenses). Although these eight offenses do not account for all crimes reported to the police, they are considered to be the most serious, frequent, pervasive, and consistently defined by different law enforcement agencies.

An indicator of the workload that law enforcement agencies place on other components of the justice system is the number of arrests made by police, including those for violent and property Index offenses and drug offenses. Unlike offenses, which are what police must respond to, arrests represent those offenders who may eventually be processed through other components of the justice system, including the courts, county jails, and state and local correctional programs.

In addition to local law enforcement agencies, the Zone 3 / LaSalle Task Force (Z3/LTF) also serves Bureau County. Throughout most of the period analyzed, there were 21 Metropolitan Enforcement Groups (MEGs) and task forces operating in Illinois. A county is considered to be served by a MEG or task force if at least one law enforcement agency within that county participated in that MEG or task force either by providing personnel or financial resources.

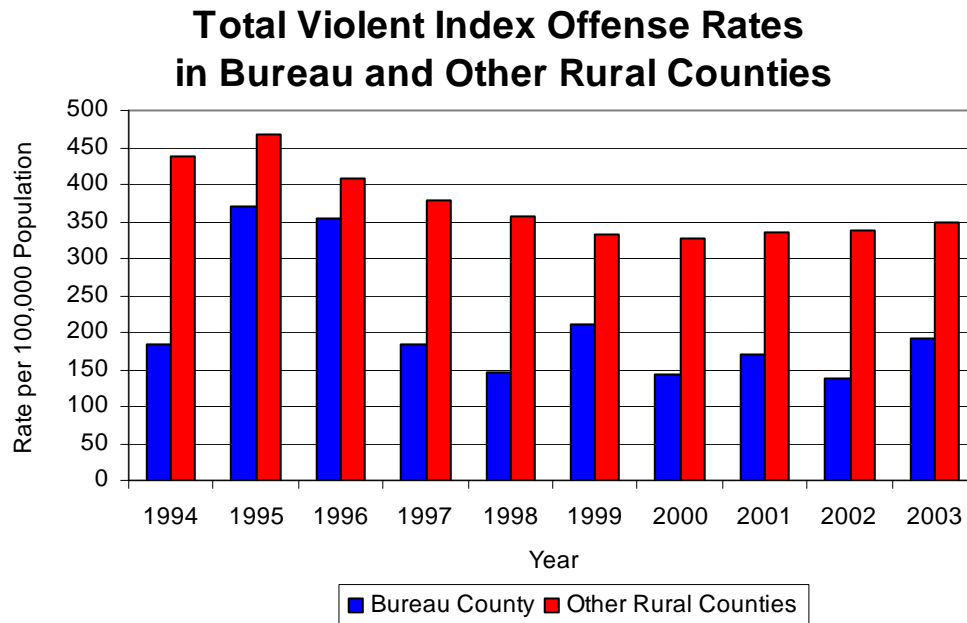

To learn more about the drug enforcement activities of the Zone 3 / LaSalle Task Force and Illinois' other MEGs and task forces, profiles of each of the units were developed by the Authority's Research and Analysis Unit and are available through the Authority's Criminal Justice Information Clearinghouse or can be downloaded from the Authority's Website at www.icjia.state.il.us.

Violent Index Offenses Reported to the Police in Bureau County

The number of violent Index offenses reported to the police increased slightly in Bureau County between 1994 and 2003, from 66 to 68. As in previous years and in most other counties, aggravated assault offenses accounted for the majority (84 percent) of violent Index offenses reported in Bureau County in 2003.

Between 1994 and 2003, the violent Index offense rate in Bureau County increased 5 percent, from 183 to 193 offenses per 100,000 population (Figure 1). Similarly, during that same period, the violent Index offense rate in the other rural counties decreased 20 percent, from 438 to 349 offenses per 100,000 population. The 2003 violent Index offense rate in Bureau County was 45 percent lower than the rate in the other rural counties.

Figure 1

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

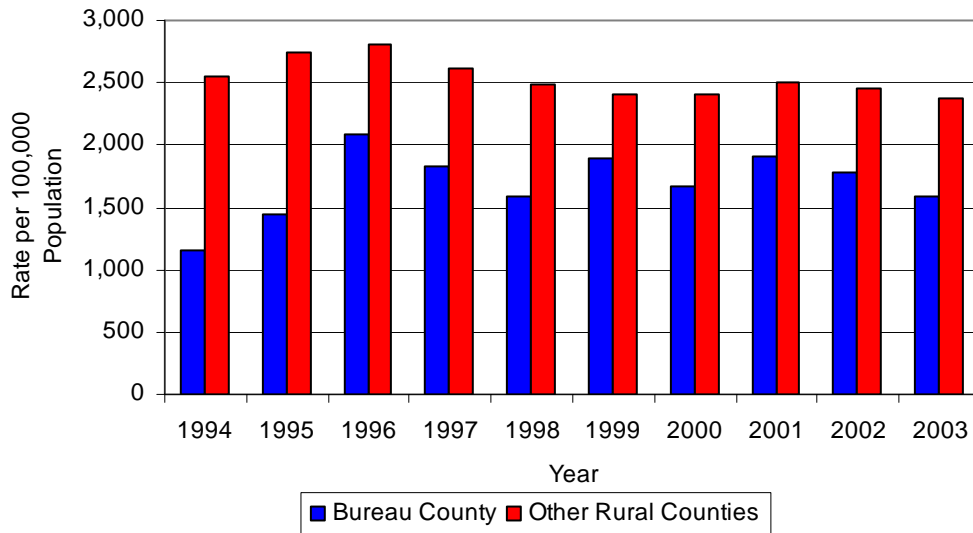

Property Index Offenses Reported to the Police in Bureau County

Between 1994 and 2003, the number of property Index offenses reported to the police in Bureau County increased 35 percent, from 414 to 558. Thefts accounted for 71 percent of all property Index offenses reported in Bureau County during 2003.

Between 1994 and 2003, the property Index offense rate in Bureau County increased 38 percent, from 1,149 to 1,584 offenses per 100,000 population (Figure 2). The property Index offense rate in the other rural counties decreased 7 percent, from 2,551 to 2,378 offenses per 100,000 population. Bureau County's 2003 property Index offense rate was 33 percent lower than the rate in the other rural counties.

Figure 2

Total Property Index Offense Rates in Bureau and Other Rural Counties

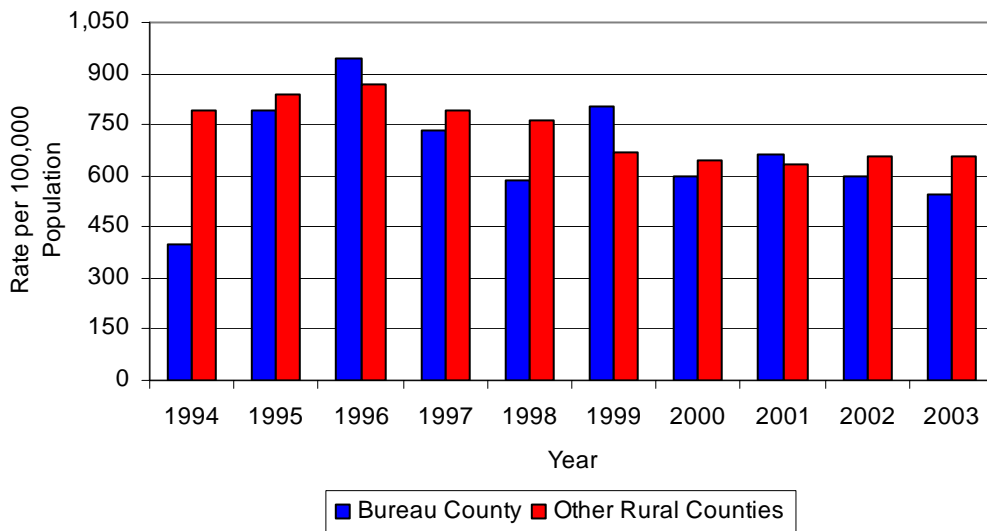

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

Index Arrests by Bureau County Law Enforcement Agencies

Between 1994 and 2003, arrests for total Index offenses by law enforcement agencies in Bureau County increased 35 percent, from 143 to 193. The majority of Index arrests were for property Index offenses. Of the 193 Index arrests made in Bureau County during 2003, 26 percent were for violent Index crimes and 74 percent were for property Index crimes. Arrests for theft and aggravated assault accounted for the majority of property and violent Index arrests in Bureau County during 2003. Of all violent Index arrests, 96 percent were arrests for aggravated assault, while thefts accounted for 63 percent of all property Index arrests.

Between 1994 and 2003, the Index arrest rate in Bureau County increased 38 percent, from 397 to 548 arrests per 100,000 population (Figure 3). During the same period, the Index arrest rate in the other rural counties decreased 17 percent, from 793 to 659 arrests per 100,000 population. In 2003, Bureau County's Index arrest rate was 17 percent lower than the Index arrest rate in the other rural counties.

Figure 3
Index Arrest Rates in Bureau
and Other Rural Counties

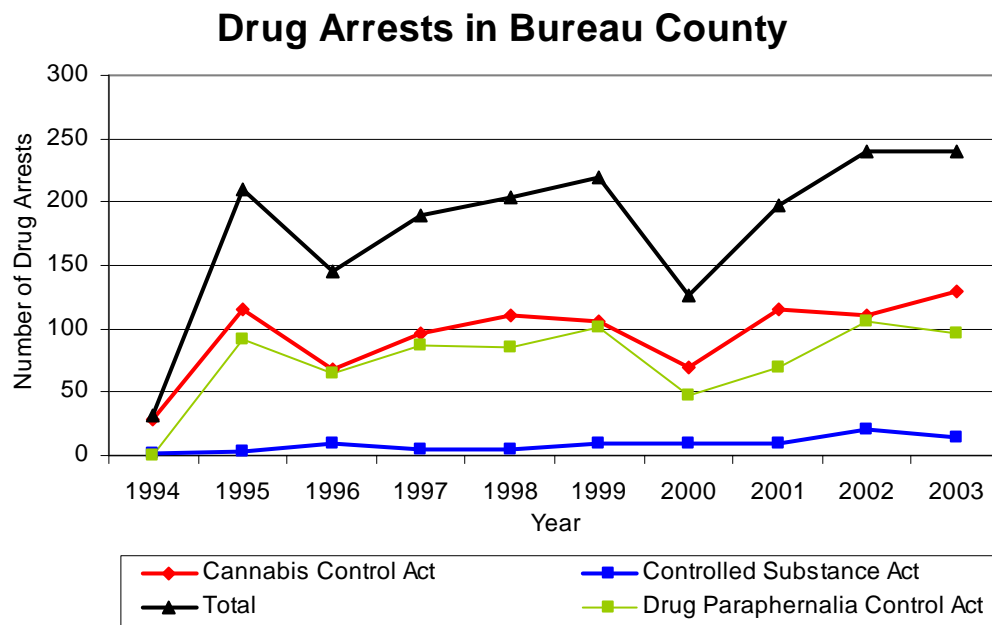

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

Drug Offense Arrests in Bureau County

Between 1994 and 2003, arrests for total drug offenses (including violations of Illinois' Cannabis Control Act, Controlled Substances Act, Drug Paraphernalia Control Act, and the Hypodermic Syringes and Needles Act) increased more than six-fold in Bureau County, from 31 to 240 (Figure 4). Similar to other counties, total drug arrests in Bureau County remained relatively stable through the early 1990s, before increasing annually nearly every year thereafter. Drug Paraphernalia Control Act violations accounted for the majority of the increase in total drug arrests, increasing from zero arrests in 1994 to 96 in 2003, or in other words, 40 percent of all drugs arrests in 2003.

During the majority of the period analyzed, arrests for violations of Illinois' Cannabis Control Act (which prohibits the possession, sale, and cultivation of cannabis) in Bureau County have consistently out-numbered arrests for violations of the Controlled Substances Act (which prohibits the possession, sale, distribution, or manufacture of all other illegal drugs such as cocaine and opiates). Between 1994 and 2003, the number of arrests for violations of the Cannabis Control Act in Bureau County jumped from 29 to 129. Arrests for violations of the Controlled Substances Act increased in Bureau County from one to 15, during the same period (Figure 4).

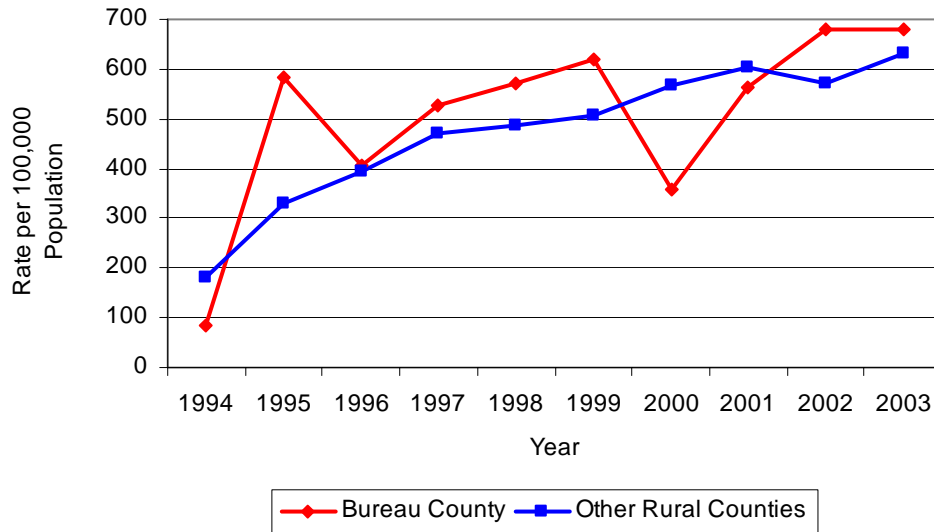

Figure 4

Source: Illinois State Police

Between 1994 and 2003, the arrest rate for all drug law violations in Bureau County increased dramatically, from 86 to 681 arrests per 100,000 population (Figure 5). The total drug arrest rate in the other rural counties more than tripled between 1994 and 2003, from 183 to 631 arrests per 100,000 population. In 2003, the drug arrest rate in Bureau County was 8 percent higher than the rate in the other rural counties.

Figure 5
Drug Arrest Rates in Bureau and Other Rural Counties

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

Drugs Seized in Bureau County

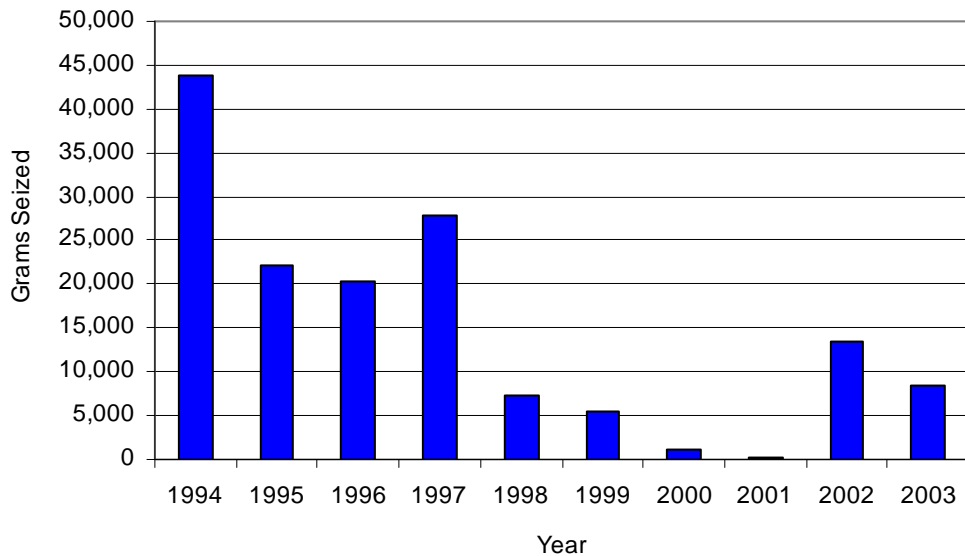

Drugs seized by law enforcement agencies are another indicator of the extent and nature of the illegal drug trade in a jurisdiction. When illegal drugs are seized by law enforcement agencies in Illinois, they are submitted to a crime lab for analysis. Most agencies submit drugs to one of the Illinois State Police crime labs. These labs record the quantity of drugs submitted from each county. This section discusses the quantities of illegal drugs seized and submitted to the Illinois State Police from law enforcement agencies in Bureau County.

Cannabis Seized in Bureau County

Cannabis accounts for the majority of drugs seized in Bureau County and in most Illinois jurisdictions. Although there were large variations in the number of grams of cannabis seized between 1994 and 2003, the quantity of cannabis seized in Bureau County decreased 81 percent, from 43,870 grams to 8,337 grams (Figure 6).

Figure 6

Cannabis Seized in Bureau County

Source: Illinois State Police

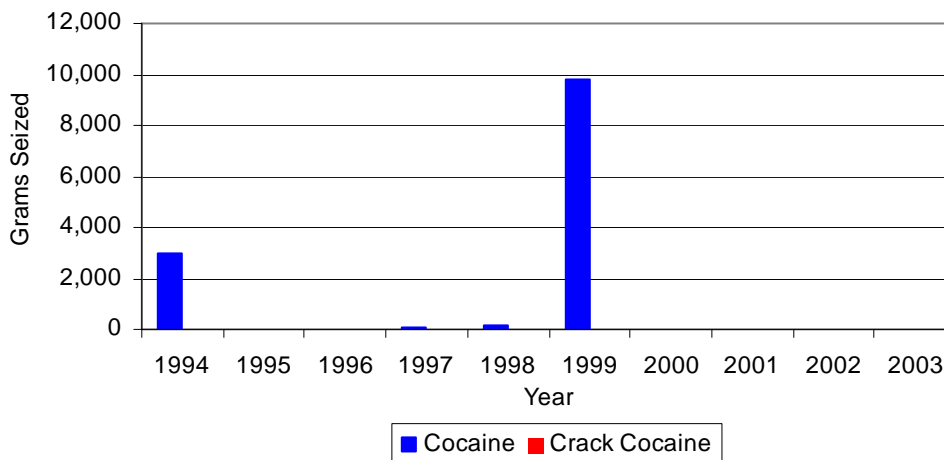

During the period between 1994 and 2003, the quantity of cannabis seized in the other rural counties decreased 53 percent, from 564,279 grams to 264,306 grams. In 2003, Bureau County had a cannabis seizure rate of 23,669 grams per 100,000 population, compared to a rate of 15,965 grams per 100,000 population in the other rural counties.

Cocaine and Crack Cocaine Seized in Bureau County

The quantity of powdered cocaine seized in Bureau County decreased dramatically between 1994 and 2003 (Figure 7). The quantity of powder cocaine seized in Bureau County decreased from 3,015 grams in 1994 to six grams in 2003. Like most other counties, crack cocaine accounted for a small portion of all cocaine seized in Bureau County. Between 1994 and 2003, a total of 34 grams of crack cocaine were seized in Bureau County.

Figure 7

Cocaine and Crack Cocaine Seized in Bureau County

Source: Illinois State Police

The quantity of powder cocaine and crack cocaine seized in the other rural counties increased dramatically during the period analyzed. Between 1994 and 2003, the amount of powder cocaine seized decreased 81 percent in the other rural counties, from 67,087 grams to 13,058 grams, while the quantity of crack cocaine seized increased 80 percent, from 1,171 grams to 2,106 grams. In 2003, 18 grams of powder cocaine per 100,000 population were seized in Bureau County, 98 percent lower than the rate of 789 grams of powder cocaine per 100,000 population seized in the other rural counties.

III. Adult and Juvenile Court Activity in Bureau County

Although Illinois has one of the best court reporting systems in the country, the Administrative Office of the Illinois Courts only collects information regarding the aggregate number of court filings, dispositions, and probation caseloads. Currently, there are no statewide data available on court filings, dispositions, and convictions by offense type. However, detailed offense data are available from the Illinois Department of Corrections for those convicted felons sentenced to prison.

Trends in the number of delinquency petitions filed and adjudicated in juvenile court are also presented. Illinois statutes define delinquency offenses as those committed by someone younger than 17 years old that would be considered crimes if committed by someone 17 years of age or older.

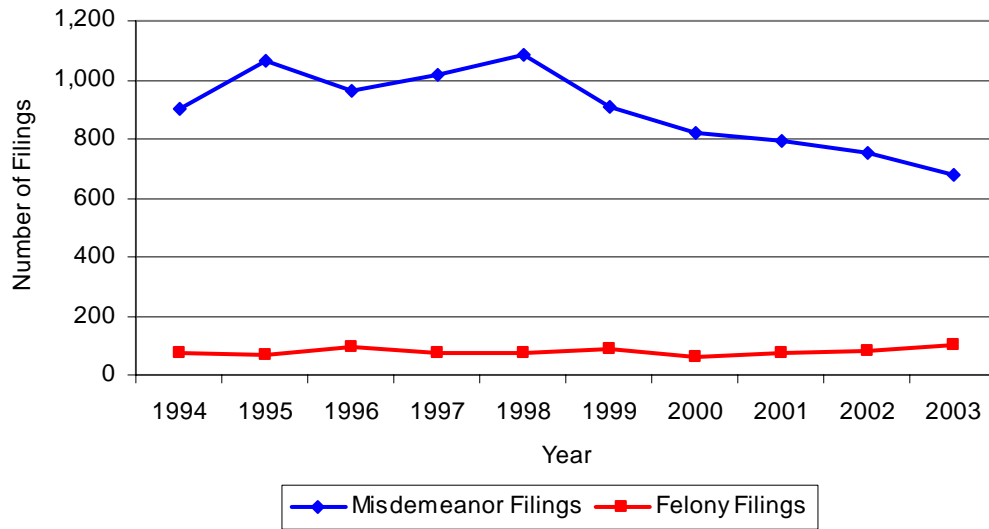

In Illinois, county probation departments are overseen by the Administrative Office of the Illinois Courts' Probation Division. This section also presents data on active misdemeanor and felony adult caseloads and the number of juveniles under the supervision of the probation departments in Bureau County and the other rural counties.

Misdemeanor and Felony Filings in Bureau County

The Administrative Office of the Illinois Courts reports data on criminal court cases in two categories: misdemeanors and felonies. After screening a case and deciding it warrants further action, the state's attorney must file formal charges in court. Misdemeanor cases are less serious than felonies and can be punished by a probation sentence of one year or less and less than one year of incarceration. Felony cases, on the other hand, are more serious and can be punished by a probation term up to four years and incarceration for more than one year. When comparing the number of filings across time and across counties, it should be noted that differences in reporting practices exist. For example, when two or more defendants are involved in a single case, some state's attorneys file a single case charging all defendants, while others file a separate case for each suspect.

In 2003, felony and misdemeanor court filings accounted for 9 percent of all filings in Bureau County's courts (civil, traffic, family, and other). Between 1994 and 2003, the number of felony filings in Bureau County increased 40 percent, from 75 to 105 (Figure 8). During the same period, misdemeanor filings decreased from 904 in 1994 to 681 in 2003, a 25 percent decrease

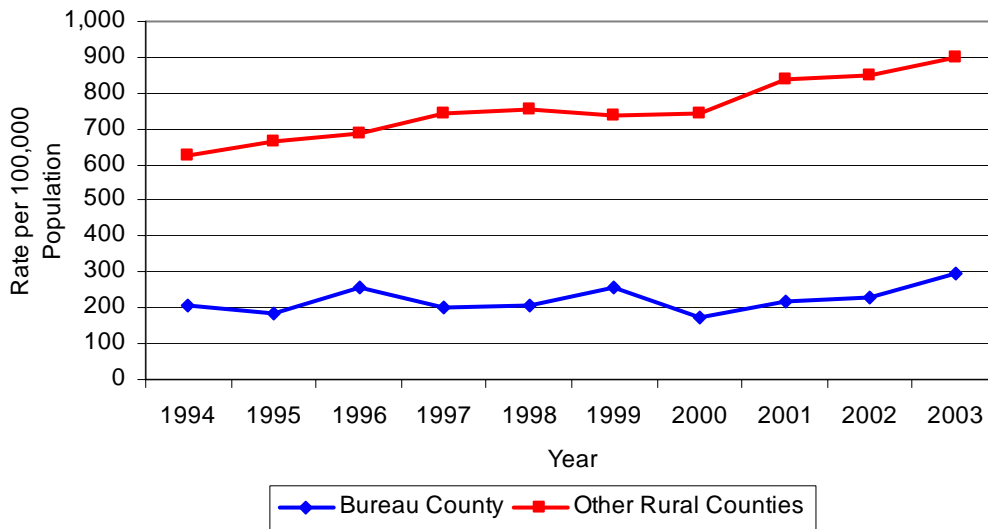

Figure 8
Felony and Misdemeanor Filings
in Bureau County

Source: Administrative Office of the Illinois Courts

Between 1994 and 2003, the felony-filing rate in Bureau County increased 43 percent from 208 cases to 298 cases per 100,000 population (Figure 9). The felony-filing rate in the other rural counties, increased 45 percent during this period, from 623 to 902 cases per 100,000 population. In 2003, the felony-filing rate in the Bureau County was 67 percent lower than the other rural counties.

Figure 9
Felony Filing Rates in Bureau and Other Rural Counties

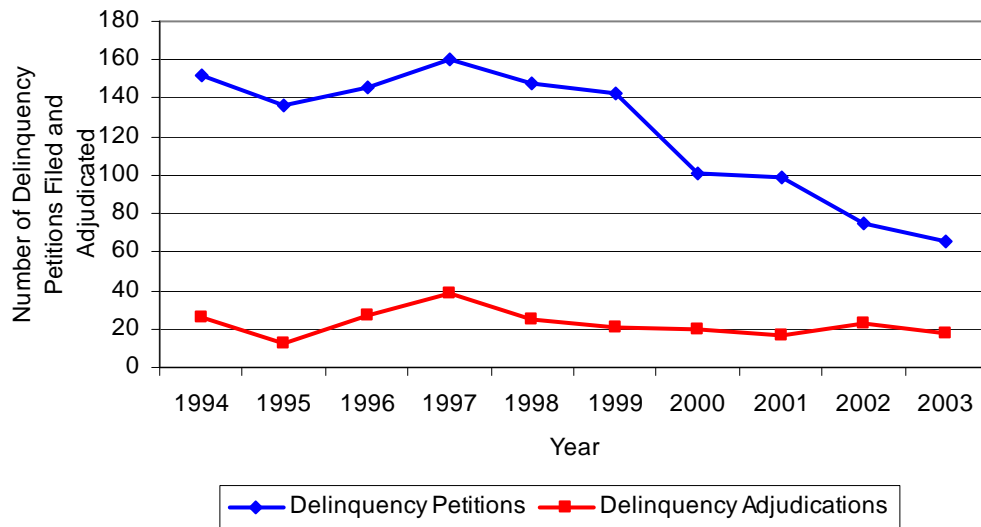

Source: Administrative Office of the Illinois Courts and U.S. Census Bureau data

Illinois’ juvenile court system differs in several key aspects from the adult criminal court system. One aspect revolves around the difference in treatment between juveniles and adults: the juvenile court process is somewhat less formal and adversarial; authorities are given much more latitude in determining the proper response to each case. Traditionally, the terminology used to describe juvenile proceedings has been less harsh than that used for the adult criminal process. For example, Illinois’ juvenile courts accept “petitions of delinquency” rather than misdemeanor or felony criminal complaints. However, pursuant to the Juvenile Court Reform Act of 1998, criminal court terms, such as “trial” and “sentencing,” have replaced the less harsh “adjudicatory hearing” and “dispositional hearing” terms.

Between 1994 and 2003, the number of juvenile delinquency petitions filed in Bureau County decreased 57 percent, from 152 to 66 (Figure 10). In 2003, 27 percent of the juveniles named in delinquency petitions were adjudicated delinquent. Between 1994 and 2003, delinquency adjudications also decreased, from 26 to 18 – a 31 percent decrease. The majority of cases not resulting in an adjudication were continued under supervision.

Figure 10

Juvenile Delinquency Petitions Filed and Adjudicated in Bureau County

Source: Administrative Office of the Illinois Courts

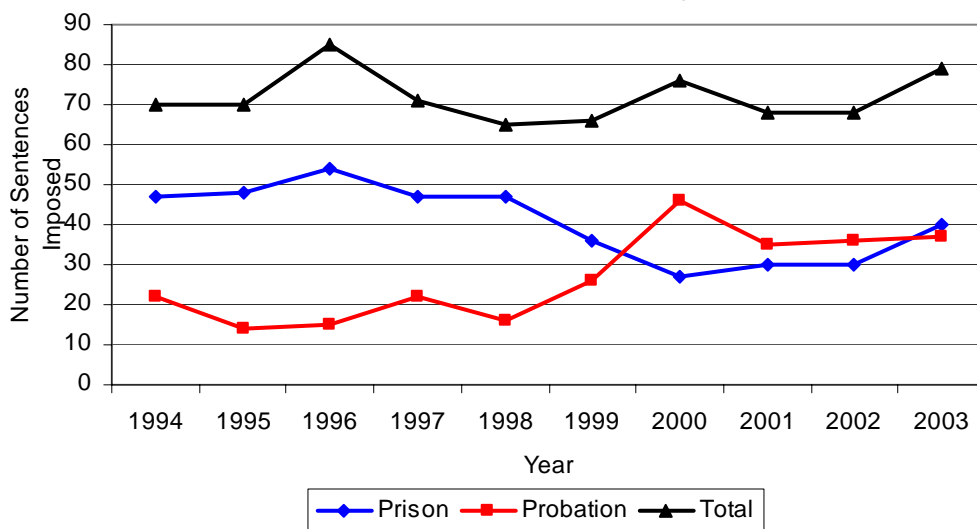

Between 1994 and 2003, the delinquency petition-filing rate in Bureau County decreased 53 percent, from 3,855 to 1,798 per 100,000 juveniles. During the same period, the delinquency petition-filing rate in the other rural counties increased 16 percent, from 1,969 to 2,277 petitions per 100,000 juveniles. In 2003, the delinquency petition-filing rate in Bureau County was 21 percent lower than the rate in the other rural counties.

Anyone convicted of a felony in Illinois can be sentenced either to prison or probation, or receive a conditional discharge. A number of factors influence the type and length of sentence imposed on convicted felons, including the severity of the crime, the offender’s criminal and social history, safety of the community, and legislation affecting certain types of offenses. For some types of convictions a sentence to prison is required by state statute.

Between 1994 and 2003, the number of offenders convicted of a felony and sentenced in Bureau County increased from 70 to 79 (Figure 11). While the number of convicted felons sentenced to probation during this period increased 68 percent, from 22 to 37, felony probation sentences increased as a proportion of total sentences. In 1994, 31 percent of all convicted felons were sentenced to probation, compared to 47 percent in 2003. Between 1994 and 2003, the proportion of felons sentenced to prison decreased from 67 percent in 1994 to 51 percent in 2003. In 2003, 2 percent of convicted felons were sentenced to something other than prison or probation.

Figure 11

Sentences Imposed on Felons Convicted in Bureau County

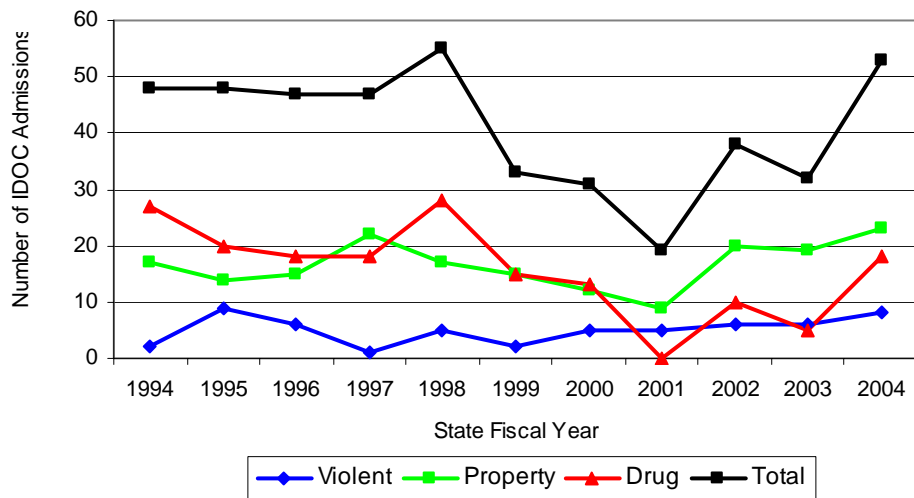

Source: Administrative Office of the Illinois Courts

Adult Prison Admissions from Bureau County

Between State Fiscal Years (SFYs) 1994 and 2004, the number of admissions to the Illinois Department of Corrections' Adult Division from Bureau County increased 10 percent, from 48 to 53 (Figure 12). The number of violent and property offender admissions increased, while drug offender admissions decreased. The number of violent offender admissions increased from two to eight, while the number of property offenders admitted increased from 17 to 23. During this period, the number of drug offender admissions decreased from 27 to 18.

Figure 12

IDOC New Court Commitments from Bureau County, by Offense Type

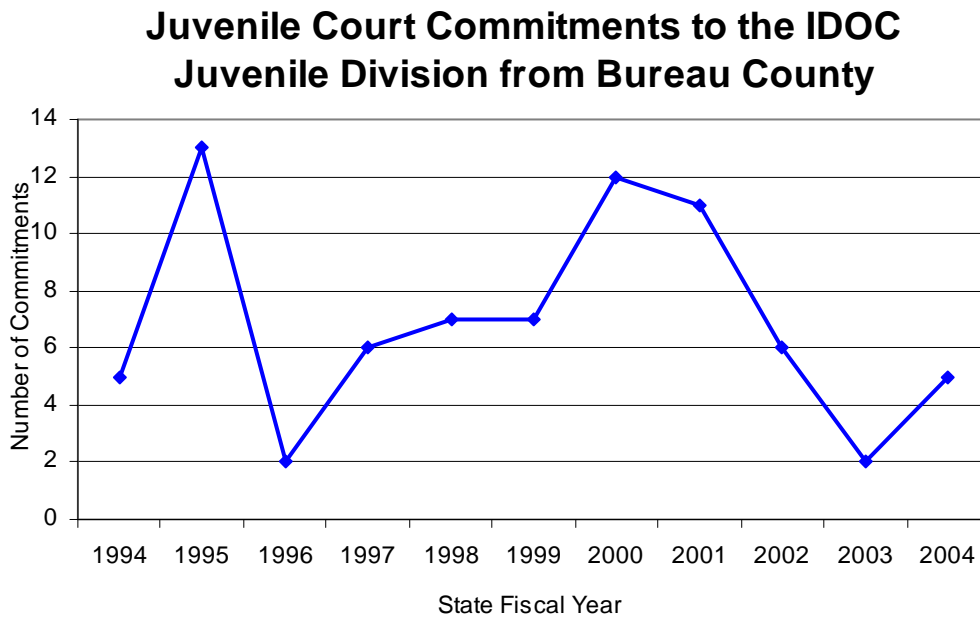

Source: Illinois Department of Corrections

In SFY 2004, violent offenders accounted for 15 percent of all admissions from Bureau County, while property accounted for 43 percent and drug offenders accounted for 34 percent. Between SFYs 1994 and 2004, the proportion of total admissions accounted for by drug offenders decreased from 56 percent to 34 percent of all admissions from Bureau County.

Juvenile Court Commitments to the Illinois Department of Corrections

The Illinois Department of Corrections' Juvenile Division provides long-term custody for youths, 13 to 17 years old, who have been found delinquent by the juvenile court and committed to the IDOC. Youths may remain in an IDOC juvenile facility until they are 21. Between SFYs 1994 and 2004, the number of court commitments to the IDOC's Juvenile Division from Bureau County remained unchanged at five (Figure 13).

Figure 13

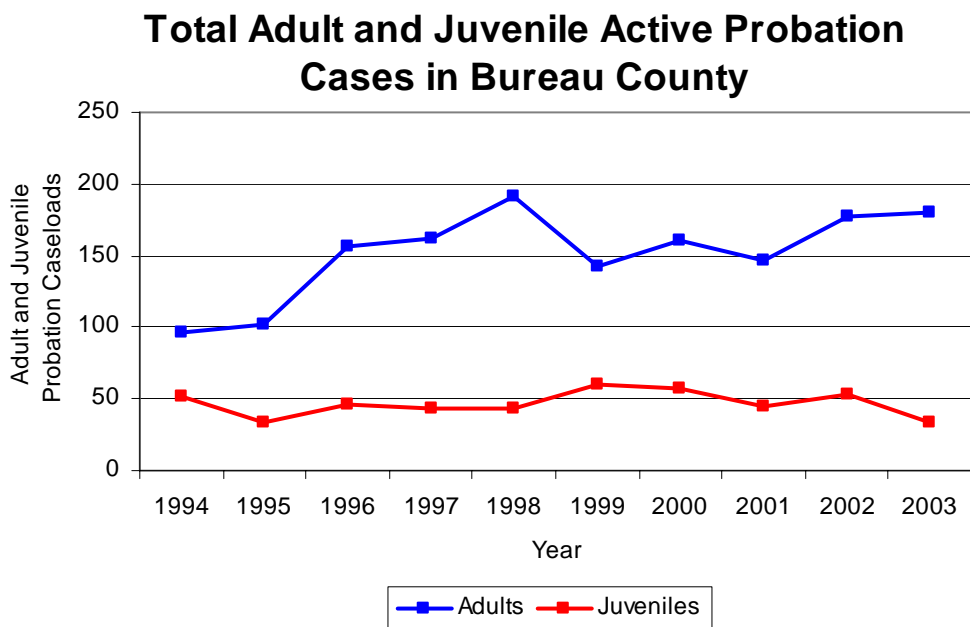

Source: Illinois Department of Corrections

In SFY 2004, Bureau County's rate of commitments to the IDOC's Juvenile Division of 151 commitments per 100,000 juveniles was 34 percent lower than the 231 commitments per 100,000 juveniles from the other rural counties.

Adult and Juvenile Probation Caseloads in Bureau County

Between 1994 and 2003, the number of active adult probation cases in Bureau County increased 86 percent, from 97 to 180 (Figure 14). In 2003, felony offenders accounted for 50 percent of Bureau County's active adult probation caseload. Between 1994 and 2003, the number of juveniles supervised by the Bureau County Juvenile Probation Department decreased 35 percent, from 51 to 33. By comparison, the number of active adult probation cases in the other rural counties increased 39 percent between 1994 and 2003, while the juvenile probation caseloads increased 1 percent.

Figure 14

Source: Administrative Office of the Illinois Courts

The active adult probation caseload rate per 100,000 population in Bureau County increased 90 percent between 1994 and 2003, from 269 to 511 cases per 100,000 population. During that same period, the active adult probation caseload rate increased 31 percent in the other rural counties, from 755 to 1,055 cases per 100,000 population. In 2003, the active adult probation caseload rate in Bureau County was 52 percent lower than in the other rural counties.

IV. Jail Populations in Bureau County

Jail data in Illinois are collected by the Illinois Department of Corrections' Bureau of Inspections and Audits. As with court data, data are not available detailing the specific offenses for which offenders were held in county jails. In addition, between SFYs 1992 and 1994, the IDOC did not collect Illinois jail population data. Data presented for SFY 1994 were estimated by the Authority using the reported SFYs 1991 and 1995 data.

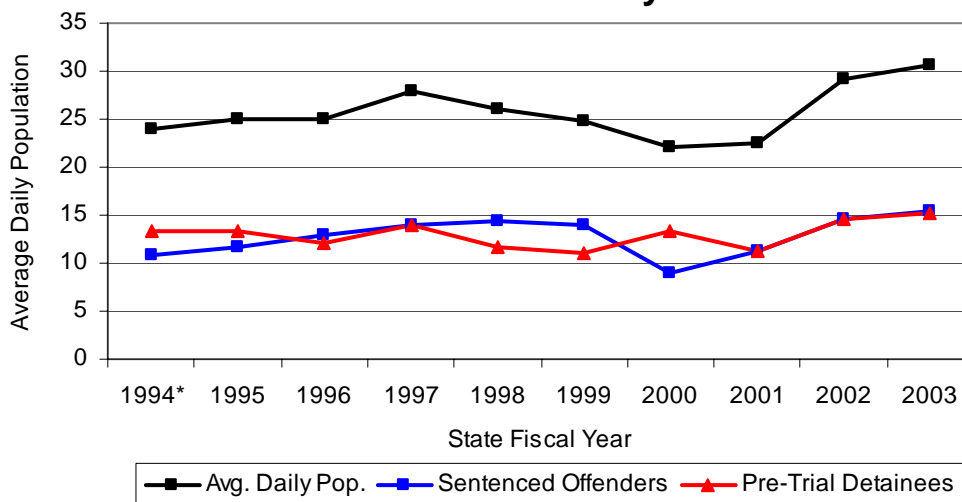

Average Daily Population of the Bureau County Jail

The Bureau County Jail was one of 91 county jails in operation in Illinois during State Fiscal Year 2003. There are 11 counties that did not operate a jail of their own; they rely on other counties to house their pretrial detainees and sentenced offenders at either a per-diem or contracted rate.

Between SFY 1994 and 2003, the average daily population of the Bureau County Jail increased 27 percent, from 24 to 30 inmates (Figure 15). During this period, pretrial detainees (those individuals who have been arrested for a crime and are awaiting trial) accounted for a decreased percentage of the average daily population; from 55 percent in SFY 1994 to 50 percent in SFY 2003. On the other hand, sentenced offenders (those offenders who have been convicted and sentenced to the county jail) accounted for an increased percentage; 45 percent in SFY 1994 compared to 50 percent in SFY 2003.

Figure 15

Average Daily Population of the Bureau County Jail

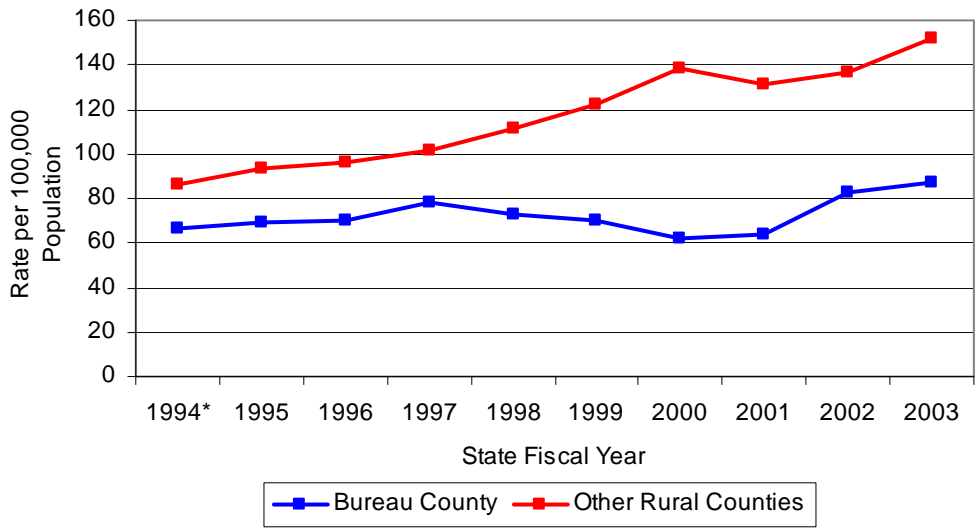

Source: Illinois Department of Corrections

* Information estimated by ICJIA

Between State Fiscal Years 1994 and 2003, the average daily jail population rate in Bureau County increased 30 percent, from 67 to 87 per 100,000 population (Figure 16). During this same period, the average daily jail population rate in the other rural counties increased 75 percent, from 87 to 152 per 100,000 population. In 2003, the Bureau County Jail had an average daily jail population rate 43 percent lower than the rate in the other rural counties.

* Information estimated by ICJIA

V. Indicators of Child Abuse and Neglect in Bureau County

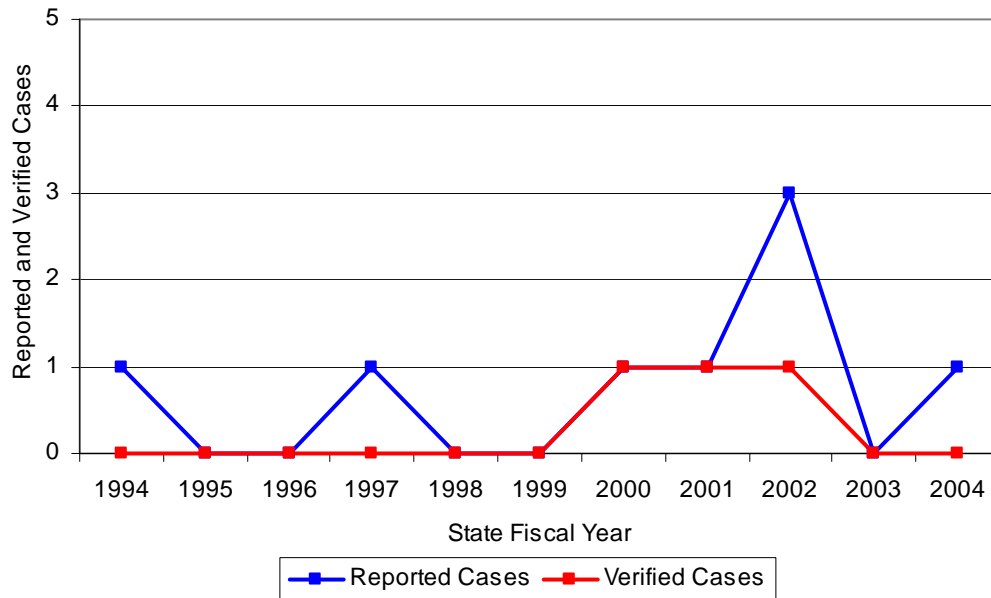

Substance-Exposed Infants in Bureau County

Illinois continues to experience the effects of prenatal substance abuse. In Illinois, if a baby is born and thought to have been exposed to illegal substances or alcohol, either through observation by physicians or toxicology tests, the case is reported to the Illinois Department of Children and Family Services (DCFS). These cases are then investigated by DCFS to verify the child's prenatal exposure to either alcohol or illegal substances. Between State Fiscal Years 1994 and 2004, 96 of Illinois' 102 counties reported at least one case of a substance-exposed infant.

Between State Fiscal Years 1994 and 2004, a total of eight cases of substance-exposed infants were reported in Bureau County, of those, three were verified. Between State Fiscal Years 1994 and 2004, the number of reported cases of substance-exposed infants in the other rural counties increased 23 percent, from 82 to 101, while the number of verified cases of substance-exposed infants increased 43 percent, from 44 to 63.

Child Abuse and Neglect Cases Reported and Verified in Bureau County

Recent research on the relationship between maltreatment of youth and delinquency has revealed an important distinction between child maltreatment and adolescent maltreatment. Using data from the Office of Juvenile Justice and Delinquency Prevention's Program of Research on the Causes and Correlates of Delinquency, researchers have found that youth that were abused during childhood (12 years of age or less) were no more likely to become delinquent than youth who were not abused, but youth who were abused during adolescence (after age 12) were significantly more likely to be delinquent.¹ While prior child abuse may not be linked to juvenile delinquency, studies examining prior child abuse have shown that childhood victimization may be linked to other poor outcomes in youth, including low academic achievement, teenage parenthood (particularly for females), drug use, and symptoms of mental illness.² Additionally, research examining adolescent victimization (including physical and sexual assaults) and adult outcomes has found a correlation between previous victimization and substance abuse, depression, and post-traumatic stress disorder in adulthood.³ In Illinois, DCFS investigates reported cases of child abuse.

Between State Fiscal Years 1994 and 2004, the number of child abuse and neglect cases reported in Bureau County increased 8 percent, from 292 to 316 (Figure 17). During that same period, 995 cases, or 30 percent of all cases reported, were verified by a DCFS investigation. Verified cases of child abuse and neglect in Bureau County decreased 16 percent between SFYs 1994 and 2004, from 90 to 76.

Between State Fiscal Years 1994 and 2004, the rate of verified cases of child abuse and neglect in Bureau County decreased from 945 to 865 per 100,000 juveniles, an 8 percent decrease (Figure 18). During the same period, the rate of verified child abuse and neglect cases decreased 14 percent in the other rural counties, from 1,931 to 1,652 per 100,000 juveniles. In SFY 2004, the rate of verified cases of child abuse and neglect in Bureau County was 48 percent lower than in the other rural counties.
