Data summary

Community context

The data elements examined in this report that describe the community in which youth live include:

- The number of youth receiving drug or alcohol treatment.
- Adult educational levels
- Unemployment rates
- Estimated median household income
- The number of minors living in poverty
- The average monthly number of children in families receiving temporary assistance to needy families

Substance abuse treatment

According to substance abuse treatment provider data received by the Illinois Department of Human Services (IDHS), 19,114 youth received substance abuse services during FY04. More than half of these services were provided to white youth (54 percent), 29 percent were provided to black youth, and 15 percent were provided to Hispanic youth. Forty-one percent of those served received intervention service, 32 percent received **outpatient** services, 11 percent received **case management** services, and 11 percent received **residential treatment** services. The remaining 5 percent received intensive **outpatient**, **home recovery**, or **detoxification** services.

Education

The most recent education data available from the U.S. Census Bureau was collected in 2000. About 6.5 million people over 25 years of age in Illinois had at least a high-school diploma. A total of 3.1 million males and 3.4 million females were high school graduates or beyond. Overall, Illinois had a rate of 81,391 persons with at least a high school diploma for every 100,000 people 25 years of age or older. When comparing education data with estimated income data, the more high school graduates there were in a county, the higher the estimated median household income was for that county.

Unemployment

In FY00, 290,862 people in the labor force were unemployed in Illinois. By FY05, that number had increased 27 percent to 370,819. The unemployment rate in FY05 was 5,719 for every 100,000 in the labor force, also a 27 percent increase from FY00. In FY05, almost 6 percent of the labor force was unemployed.

Income

The most recent income data available from the U.S. Census Bureau were collected in 2005. The estimated median household income in Illinois that year was \$50,270, an 8 percent increase from 2000, when the median household income was \$46,372.

Poverty

In 2005, 524,897 youth ages 17 years old and younger were living in poverty in Illinois, a rate of 16,275 for every 100,000 people under the age of 18. This is a 12 percent increase from 2000.

To calculate the definition of poverty, the U.S. Census Bureau uses a set monetary income threshold for families that changes according to family size. This threshold does not change geographically, but is adjusted for inflation. For example, in calendar year 2004, a family of four with two adults and two children, had a threshold of \$19,157. A family of three with one adult and two children had a threshold of \$15,219.

Temporary assistance to needy families

The United States Department of Health and Human Services (DHHS) grants states federal funds to implement the Temporary Assistance to Needy Families (TANF) Program. In Illinois, these funds are distributed locally by IDHS. Citizens apply for assistance at their local TANF agency and, if they meet the requirements, are offered temporary financial assistance to help pay for food, shelter, utilities, and other expenses. In Illinois, the average monthly TANF cash grant is \$239.²

From FY00 to FY05, a significant reduction was seen in the average monthly number of families with children ages 10 to 18 in Illinois receiving TANF. In FY00, an average of 190,782 youth were living in families that received TANF monthly, while in FY05, an average of 81,991 youth received TANF monthly, a reduction of 57 percent.

A reduction also was seen nationally in youth recipients of TANF funding. This drastic reduction is largely attributed to the five-year time limitations placed on TANF recipients in the 1996 welfare reforms. (See Personal Responsibility and Work Opportunity Reconciliation Act of 1996, Pub. L. No. 104-193, 110 STAT. 2105) In October 2002, six TANF offices in Illinois were closed and counties started combining services. In February 2005, three more TANF offices were closed and TANF services were combined with other counties.

Appendix H: Data tables section

The following data tables include county-level detail for several dozen juvenile justice data elements. When available, some data elements were also broken down by demographics, such as age, race, and gender. Data is provided by calendar year, academic year, or Fiscal Year, depending upon the reporting agency. Whenever possible, both 1999 and 2004 data were included.

Many caveats have been mentioned throughout this report regarding the interpretation of the following data. The bullet points below describe additional issues that should be considered when reviewing the data tables.

- If there is a blank space where data should be, then data were not available.
- When zero (0) is listed for a particular data element, there are two interpretations
 - o There were zero instances of that particular event occurring.
 - o Zero instances of that particular event were reported.

For instance: A zero appears for Greene County in the youth arrests table. This could be interpreted as Greene County not having any youth arrests for 2004, or that Greene County did not report any youth arrests to the Illinois State Police, but actually did arrest juveniles.

Whenever possible, rates were calculated by using the population most appropriate to the data element. For example, youth incarceration rates were calculated using the youth population 13-16 since a youth under the age of 13 cannot be incarcerated in an Illinois Youth Center, and youth 17 or older are considered adults in Illinois.
