Advanced Public Safety (APS) develops innovative technology solutions that improve the safety and effectiveness of law enforcement officers. APS is the market leader in voice solutions, electronic ticketing applications, reporting and data transfer to court/RMS systems. The solutions created by APS are unique because all our applications are designed, developed and tested by and for police and sheriffs' officers, men and women who are uniquely qualified to understand today's public safety needs.

APS has been selected by Cook, DeKalb, DuPage, Kane, McHenry, and Will County Circuit Clerks to deploy Enterprise Level solutions for e-citations and traffic stop reporting.

DigitalBridge was founded in 2004, in Orem, Utah, by leading executives from the technology, education, healthcare, justice, and legal industries. DigitalBridge's mission is to build solutions that enable protected information sharing between individuals and organizations involved in simple and complex ecosystems, while protecting the security, privacy and integrity of the information. DigitalBridge's revolutionary, patent-pending DigitalFusion™ platform, incorporating Digital Packet Technology™ solutions, is a completely new architecture for managing information in motion. These solutions provide protected information sharing to digital ecosystems in the education, justice, and healthcare markets. DigitalBridge's unique solutions interoperate with existing legacy systems without requiring replacement, allowing authorized users to access the right information, at the right time, in the right context, in a secure and timely manner, from any Web-enabled device.

DigitalBridge's efficient Digital Warrants™ solution is a Web-based system for the processing of warrants. Individual case information passes through the justice ecosystem of all necessary officials and entities digitally powered by our Digital Transaction Engine™ technology, including prosecutors, courts personnel, sheriffs, probation professionals, and others in a secure process, saving time, money, and lives. DigitalBridge is helping the fifth largest criminal court system in the world process an annualized workflow of 70,000 warrants.

For state and local governments who want law enforcement and justice related agencies to more effectively share information, Metatomix provides justice and homeland security solutions to support better public safety decisions, streamline processes and dramatically lower the cost of administering justice. Metatomix solutions intelligently automate JIEM (Justice Information Exchange Model) exchanges of information, provide single views of subjects across multiple agency data sources from a single screen, and sign-on and perform advanced correlation of information for investigations, sentencing, and corrections activities. Metatomix solutions are proven, scalable, and typically implemented for less than one-quarter the cost and one-half the time of conventional justice information sharing projects.
