

YOU ARE INVITED...

Your expertise is needed in the effort to create a statewide integrated justice system.

WHAT IS INTEGRATION?

Integration is the ability to share critical information electronically at key decision points throughout the justice system.

WHY IS INTEGRATION IMPORTANT?

Justice cannot be properly administered without complete and accurate information. Many inadequacies exist today in the collection, storage, and dissemination of information needed to effectively administer criminal justice and protect Illinois citizens. While much information is stored electronically in Illinois, very little of it is available quickly across agency boundaries. Information that has been integrated from all Illinois justice agencies will be more complete, timely, and accurate, and creates more efficiency and effectiveness in the administration of justice

VISION

Illinois can become a nationally recognized leader with the creation of statewide justice information sharing capabilities that provide secure and timely access to accurate and complete information throughout the justice system. Through integrated justice information sharing we will enhance the safety, security, and quality of life in Illinois, and improve the quality of justice and the efficiency of operations, and ensure informed decision-making, while protecting privacy and confidentiality of information.

MISSION

IIJIS strives to:

- Bring stakeholder organizations together to comprehensively and effectively plan justice information systems.
- Provide leadership in the planning and facilitation of electronic information sharing.
- Build and expand the range of effectiveness of information systems and sharing capabilities.
- Improve the effectiveness, efficiency, timeliness, accuracy, and completeness of information.

The IIJIS Implementation Board represents justice agencies spanning the full spectrum of the justice system, including law enforcement, prosecution, defense, the judiciary, corrections, and relevant non-justice agencies, at city, county, and state levels.

We encourage you or a representative from your agency to participate in strategic planning, implementation, and other important areas of this endeavor.

Vicky Rogers, Funding Committee Chair

IIJIS GOALS

- Maintain a governing body of stakeholders to oversee and guide the development, implementation, and evaluation of effective electronic justice information sharing initiatives.
- Integrate collection and sharing of justice data.
- Serve justice, public safety, and homeland security needs while preventing unauthorized disclosures of personal information and allowing appropriate public access.
- Cultivate sufficient and coordinated funding and other resources for integration.
- Create standards for data sharing and infrastructure development.
- Develop and secure reliable, effective, and efficient information technology and infrastructure that facilitates justice information sharing.
- Ensure rapid identification via biometric technologies.

INTEGRATION BENEFITS ACROSS THE CRIMINAL JUSTICE SYSTEM

Public

- Improved justice, public safety, and homeland security
- Increased protection of the innocent
- Improved government services
- Appropriate public access to data
- Improved access to information for victims and witnesses

Court Clerk

- More efficient court process
- Increased availability of criminal/incident data
- Increased electronic transmission/submission
- Timely notification of offenses
- Enhanced public access to data

Defense Attorneys

- Increased ability to protect the innocent
- More timely access to case history information
- Online case tracking
- Enhanced ability to manage caseloads
- Minimized redundant data entry

Law Enforcement

- Increased ability to provide justice, public safety, and homeland security
- Increased officer safety
- Rapid identification and background information for potentially dangerous individuals
- More complete and accurate information at key decision points
- Enhanced intelligence information sharing

Enhanced safety, security, and

quality of life in Illinois

Judges

- More complete information at key decision points
- Rapid electronic access
- More complete records
- More effective and efficient case management
- More rapid and complete orders and decisions

State's Attorneys

- More informed charging decisions
- Rapid access to accurate information
- Elimination of redundant data entry
- More complete case histories
- Online case tracking
- Rapid positive identification

Corrections/Parole

- Increased correctional officer safety
- More informed decisions for correctional placement
- More informed parole decisions
- Timely notification of parole violation
- Rapid positive identification
- Reduced inmate processing time

Probation

- Timely and accurate access to information
- Timely notification of re-arrest or violation of terms
- More timely and accurate client information
- Minimized redundant data entry
- More complete information on previous criminal proceedings

Public Officials

- More efficient use of fiscal resources
- Improved public safety
- Improved government services
- More informed policy decisions
- Increased public confidence
