

# **Coordinating State, County and Local Integration Efforts**

Panel Discussion

---

# Federal Responsibilities

- ✓ Developing, maintaining and supporting *national and federal systems*;
- ✓ Ensuring *integration of national/federal systems*;
- ✓ Serving as *gateway to international systems*;
- ✓ Creating and maintaining the national and federal *infrastructure* necessary to support secure, real-time information sharing of federal, state and local systems;
- ✓ Creating and maintaining *nationwide information repositories/systems*;
- ✓ Data and information *standards* to enable sharing of information between local jurisdictions, to state systems, and to national systems;
- ✓ *Leadership* for IT planning and development and, in the context of this effort, particularly focusing on integrated justice; and
- ✓ *Funding* for statewide IT and integrated justice initiatives that will help build information sharing capabilities nationwide, and will further support local jurisdictions and agencies and enable their active participation.

# State Responsibilities

- ✓ Building **statewide information repositories/systems** that support the operational information needs of local and state users (e.g., criminal history records, statewide warrants database, correctional information systems);
- ✓ Developing and supporting **standards** consistent with national standards to enable sharing of information between local jurisdictions, to state systems and other states, as well as with national systems;
- ✓ Developing the **infrastructure** that will support and enable integration of local agencies statewide (i.e., to share data within their local environment, as well as with the state and national systems).;
- ✓ Operating as a **gateway to relevant national/federal information repositories/systems** (e.g., IAFIS, NCIC, NIBRS, etc.);
- ✓ Mandating **statewide coverage for critical systems**, functions and capabilities;
- ✓ **Enabling sharing of information statewide**;
- ✓ Providing **leadership** for statewide IT planning and development and, in the context of this effort, particularly focusing on integrated justice;
- ✓ Providing **funding** for statewide IT and integrated justice initiatives (where possible), and in support of local jurisdictions and agencies to enable their active participation; and
- ✓ Enabling local agencies and jurisdictions to **buy IT resources and solutions off state contracts**.

# County/Local Responsibilities

- ✓ Support and maintain information systems within their own, individual agencies;
- ✓ Establish and enable the sharing of the day-to-day information that serves as the operational currency of locally integrated systems, (e.g., sharing of general case information, court calendar and scheduling information, etc.);
- ✓ Participate in critical statewide integrated systems planning efforts;
- ✓ Implement standards jointly developed with the state in support of statewide systems and integrated justice; and
- ✓ Accept and implement an interface with state systems or other solutions that support statewide integrated justice initiatives.
