

REVISED ON APRIL 22, 2014¹ HB4299 RECLASSIFICATION & SENTENCING REDUCTIONS FOR CANNABIS OFFENSES 720 ILCS 550 SECTIONS 4, 5, AND 8

TOTAL COSTS AVOIDED OVER THREE YEARS: \$22,164,918 PETTY OFFENSE REVENUE OVER THREE YEARS: \$885,630

House Bill 4299 reclassifies Cannabis Control Act offenses as follows (see chart on next page):

- (1) Possession of less than 30 grams becomes a petty offense with a fine of \$100; a second or subsequent offense is a Class A misdemeanor for 10 to 30 grams,
- (2) Possession of 30 to 500 grams reclassified from a Class 4 felony to a Class A misdemeanor for the first offense,
- (3) Possession of 5 to 20 cannabis plants reclassified to petty or misdemeanor offenses, and
- (4) Manufacture or delivery of less than 30 grams reclassified to either a petty offense or a Class A misdemeanor.

This reclassification structure would result in fewer incarcerations overall and shorter prison sentences in the Illinois Department of Corrections (IDOC) for these offenses. Reclassifying misdemeanors to petty offenses would significantly reduce local government costs for pretrial detention, jail sentences, and probation supervision, as well as generate revenue from petty offense tickets.

SPAC used data from 2010, 2011, and 2012 for arrests, convictions, the IDOC admissions, and probation sentences to identify the number of individuals charged with cannabis offenses in those years. Had HB4299 been in effect during these three years, state and local governments would have avoided costs of \$22 million and generated \$885,630 in revenue. By individual statute section, the costs avoided and added revenue are:

| 720 ILCS 550 Section: | Statute Description | Current costs | Costs under HB4299 | Total Benefits* |
|--------------------------|---|---------------|-----------------------|--------------------|
| 4(a) | Possession Less Than 2.5 grams Cannabis | \$6,838,262 | -\$306,900 | \$7,145,162 |
| 4(b) | Possession 2.5 to 10 grams Cannabis | \$7,044,261 | -\$323,300 | \$7,367,561 |
| 4(c) | Possession 10 to 30 grams Cannabis | \$12,372,467 | \$3,639,539 | \$8,732,929 |
| 4(d) | Possession 30 to 500 grams Cannabis | \$6,938,326 | \$8,099,986 | -\$1,161,660 |
| 5(a) | Manufacture or Delivery Less Than 2.5 grams | \$139,578 | -\$5,400 | \$144,978 |
| 5(b) | Manufacture or Delivery 2.5 to 10 grams | \$1,375,765 | -\$54,100 | \$1,429,865 |
| 5(c) | Manufacture or Delivery 10 to 30 grams | \$8,560,283 | \$9,538,010 | -\$977,727 |
| 8(a) | Possession of Cannabis Plants, Fewer Than 5 | \$333,851 | -\$13,300 | \$347,151 |
| 8(b) | Possession of Cannabis Plants, 5 to 20 Plants | \$980,121 | \$957,831 | \$22,290 |
| | TOTAL | \$44,582,914 | \$21,532,366 | \$23,050,548 |

^{*} Total Benefits include costs that would have been avoided had the legislative proposal been in effect *and* revenues that would have been generated by petty offense fines.

In the chart above, the total benefits column includes both local and state costs, which are categorized in the chart on the following page. This report explains each subsection's calculation on the pages 6-14.

¹ SPAC updated the cannabis analyses to correct the number of arrests for Cannabis Possession of between 2.5 and 10 grams and the number of withheld judgments with supervision requirements for Cannabis Possession of between 10 and 30 grams in Illinois from 2010 to 2012. The latter change increased the potential benefits in all three legislative proposals. The potential benefits increased because more offenders than originally identified would be removed from probation caseloads.

| Change in: | Dollar Benefits |
|----------------------------|------------------------|
| Local Detention Benefits | \$386,588 |
| Local Probation Benefits | \$19,262,517 |
| Total Local Costs Avoided | \$19,649,105 |
| State Prison Benefits | \$2,515,813 |
| State Supervision Benefits | \$0 |
| Total State Costs Avoided | \$2,515,813 |
| Total Costs Avoided | \$22,164,918 |
| Revenue | \$885,630 |
| Total Benefits | \$23,050,548 |

POLICY QUESTION: Will this policy change generate an increase in crime that would outweigh the benefits of this proposal?

HB 4299 Changes in Sentence Classifications – petty offense fines are \$100

| Ove | er 200 plants | | | | | Class 1 | Class 1 |

OUTCOMES: This analysis was prepared using the Illinois Results First approach. When fully populated with state criminal justice data on costs, system involvement, and programming, the Illinois Results First cost-benefit model will be capable of estimating the number of victimizations added or avoided through implementation of this proposal. As a general proposition, incapacitation reduces the number of crimes committed while individuals are incarcerated; however, diversion, treatment, and educational programs can be highly effective in reducing recidivism. The increase in crime may therefore be offset by the benefits of increased access to programs and services that reduce recidivism. This would produce a possible positive multiplier effect that cannot easily be quantified.

METHODOLOGY: SPAC performed a retrospective analysis of data on arrests, convictions, and sentences for cannabis offenses in calendar years 2010, 2011, and 2012. This approach does not project future impact. SPAC's calculation is the change in costs incurred by state and local governments had the legislative proposal been in effect for those years.

SPAC calculates and sets cost figures annually so that analyses are consistent over the legislative session. For IDOC, SPAC uses a marginal cost of \$5,961, the cost of adding one additional inmate, if the population impact is less than 800 inmates, the equivalent of a housing unit. If the population impact exceeds 800 inmates, SPAC will use the per capita cost of \$21,600, which accounts for the increased administrative and operational costs of obtaining and maintaining additional bed space.

For local costs, SPAC surveyed county jails on marginal costs. The responses provided a statewide average marginal jail cost of \$15,256 that incorporates Cook County, suburban counties, and counties across the state. The Administrative Office of the Illinois Courts (AOIC) calculated the cost of probation based on risk level. \$1,800 is the average of these annual costs.

To calculate the cost of public spending on these offenses for 2010 through 2012, SPAC used Criminal History Reporting Information (CHRI) and IDOC data on the number of arrests, convictions, admissions to prison and probation and the average length of stay in criminal justice facilities. During these three years, the data show:

| probation and the average length | Possession | | | Manufacture or Delivery | | | Other | Plant Production |
|-----------------------------------|----------------|---------|---------|-------------------------|---------|-----------|-----------|---------------------|
| Cannabis | 2010 2011 2012 | | 2010 | 2011 | 2012 | 2010-2012 | 2010-2012 | |
| Arrests | 49,050 | 44,615 | 41,423 | 4,413 | 4,101 | 4,010 | 3,650 | 1,269 |
| Convictions | 5,840 | 4,942 | 3,128 | 1,524 | 1,475 | 1,371 | 650 | 323 |
| Probation | 780 | 730 | 705 | 783 | 758 | 689 | 264 | 183 |
| Withheld Judgments | 3,242 | 2,717 | 1,746 | 355 | 347 | 325 | | |
| IDOC Admissions | 253 | 215 | 243 | 452 | 426 | 396 | 180 | 39 |
| Average Sentence Imposed | 2.2 yrs | 2.2 yrs | 2.0 yrs | 3.3 yrs | 3.4 yrs | 3.5 yrs | 3.5 yrs | 3.0 yrs |
| Average Prison Time Served | 0.5 yrs | 0.6 yrs | 0.7 yrs | 1.0 yrs | 1.0 yrs | 1.2 yrs | 1.1 yrs | 0.8 yrs |
| Average Pretrial Detention Period | 0.2 yrs | 0.3 yrs | 0.3 yrs | 0.3 yrs | 0.3 yrs | 0.3 yrs | 0.3 yrs | 0.2 yrs |
| Total time in custody (years) | 0.7 | 0.9 | 1.0 | 1.3 | 1.3 | 1.5 | 1.4 | 1.0 |

Source: SPAC analysis of CHRI and IDOC data

NOTE: The differences in arrest, conviction and sentencing numbers reflect the effect of charging decisions, plea bargains, and trial outcomes. Many individuals arrested for these cannabis offenses have charges dropped without a guilty plea or trial. Other offenses receive "withheld judgments," which occur when an offender pleads guilty and gets sentenced to 1410, 710, or TASC probation. If the offender successfully completes the probation the plea is vacated. If an offender is sentenced to court supervision, the judgment is not entered and

² The Illinois Results First cost-benefit model is being developed with assistance from the Pew-MacArthur Results First initiative, a project of the Pew Charitable Trusts and the John D. and Catherine T. MacArthur Foundation that works with states to implement an innovative cost-benefit analysis approach to state policy decision making.

the charges are dismissed at the end of the supervision term. In both cases the offender avoids a criminal conviction for that offense.

LIMITATIONS AND ASSUMPTIONS:

- 1. The analysis excludes the cost of state supervision during mandatory supervised release.
- 2. SPAC does not include the local costs for detaining offenders who are arrested but not convicted or given a withheld judgment.
- 3. The administrative costs of issuing tickets and collecting petty offense fines could not be determined due to data limitations.
- 4. For felonies that become misdemeanors under the proposal, SPAC assumes offenders will receive the maximum misdemeanor sentence length. If the sentences imposed are shorter, then SPAC's expected costs under the proposal may be higher than would actually be experienced.
- 5. To calculate the total number of offenders with arrests, convictions, probation sentences, or withheld judgments, SPAC counts the number of offenders with at least one charge under each subsection of the Cannabis Control Act. For the total number of offenders admitted to IDOC, SPAC counts offenders only under their most serious offense.
- 6. The capital costs of construction are not included.
- 7. Costs for criminal justice employees' health and pension benefits are not included because they are often not budget items for, or expenses seen by, individual agencies.

SPAC's Fiscal Impact figures may not match IDOC's Fiscal Notes for the following reasons:

- 1. IDOC projects forward ten years based on the past year's prison admissions. In contrast, SPAC analyzes the prior three years and calculates the costs that would have occurred had the proposed changes been the law. Both methods assume there are no additional offenders being sentenced and—consistent with criminology research—that changes in sanction lengths do not have a significant deterrent effect.
- 2. For population increases greater than 500 beds, IDOC accounts for construction costs associated with the increased space needed. Please note that "construction costs" reflect not only construction or repurposing of facility space, but also the higher operational costs required for providing additional beds over time.
- 3. SPAC determines annual cost estimates at the beginning of each year and uses these estimates in every analysis. This method allows for comparisons of bills throughout the legislative session terms.
- 4. If the impact on the average daily population (ADP) is 800 people or more, SPAC uses a per capita cost which accounts for the increased administrative and space-management costs. If the change is less than 800, SPAC uses the marginal cost of incarceration which is the additional cost of adding just one inmate to the population, which does not require administrative or space-management costs. SPAC uses this number because 800 beds equals one housing unit and four housing units make one prison.

IMPACT OF PROPOSED LEGISLATION ON STATE PRISONS:

\$2,515,813 costs avoided over three years.

Had this proposal been in place from 2010 through 2012, IDOC would have seen these reduced costs using the annual marginal cost of \$5,961 per inmate. This cost excludes IDOC post-release supervision costs and is due mainly to fewer Class 4 felony offenders entering prison.

IMPACT OF PROPOSED LEGISLATION ON COUNTY JAILS:

\$386,588 costs avoided over three years.

Jails would see a change in their average daily population due to changes in the number of offenders detained and misdemeanor sentences that could include jail time. This reduction is offset somewhat by additional offenders shifting from felony prison sentences to misdemeanor county jail sentences. For this analysis, SPAC assumes that the average length of pretrial detention time is unchanged by this legislation. SPAC also assumes that individuals charged with petty offenses would not be subject to any detention.

- SPAC uses an estimated pretrial detention cost of \$15,256 per inmate per year.
- SPAC conservatively excludes the cost of detaining individuals arrested or charged but not convicted. Avoiding these detentions would result in additional cost savings for jails.

IMPACT OF LEGISLATION ON VICTIMS, PUBLIC SAFETY, AND COMMUNITIES: unknown.

Generally, a decrease in incarceration will result in an increase in crime. The extent of the increase depends on the future conduct of offenders not in custody. Evidenced-based programs for diversion, treatment, cognitive skills, and education can measurably reduce recidivism; therefore if resources are shifted from incarceration into those programs the recidivism reduction effect could offset any increase in crime. The balance between the benefits of reducing the use of incarceration, increasing access to evidence-based programming, and the costs of additional crime can be determined through the use of cost-benefit analysis. SPAC is developing the methodology to analyze these effects.

IMPACT OF LEGISLATION ON PROBATION:

\$19,262,517 costs avoided over three years.

As a general rule, probation costs significantly less than prison. For this analysis, SPAC used \$1,800 per individual per year as the average cost of probation based on information provided by AOIC for FY13. The costs avoided are due to currently probationable offenses being reclassified to a petty offense. This change in caseload does not signify a change in the need for probation officers to adequately supervise all offenders sentenced to probation.

IMPACT ON CANNABIS PETTY OFFENSE REVENUE:

\$885,630 additional revenue over three years.

Had the legislation been in effect from 2010 to 2012, many individuals would have received \$100 fines resulting in annual revenue of \$295,210. SPAC estimated this revenue generated from 8,128 offenders and added it to total statewide benefits.

OTHER UNKNOWN IMPACTS OF PROPOSED LEGISLATION:

JUDICIAL SYSTEM. Petty offense processing would consume administrative resources. However, the additional administrative processing may be offset by fewer misdemeanor cases by courts. Due to the multitude of possibilities for implementing the administrative processing of the petty offense tickets, SPAC was unable to reliably estimate the size of these two effects.

LAW ENFORCEMENT. At this time, no reliable data are available to estimate the effects on law enforcement operations of reclassifying these offenses.

IDOC ADMISSIONS AND POPULATION FOR CANNABIS OFFENSES

These two charts illustrate the cannabis offender population housed by IDOC.

These charts illustrate the number of admissions and inmates held by IDOC by class. The charts show the number of cannabis offenders, which are a small percentage of the total admissions and incarcerated population. The charts illustrate that, while lower-level felonies account for a high number of admissions, they do not remain in the IDOC population long enough per conviction to be a driver of the total IDOC population. Offenders in this category may be processed into and out of IDOC more than once in a calendar year.

The population chart illustrates the composition of the IDOC population on June 30, 2012. The long-term population of Class 2 through Murder offenders comprises a much larger percentage of the inmates that are incarcerated for over one year. Offenders with longer sentences remain in IDOC and, even with few admissions, drive the population over time as illustrated by the fact that Class X felons account for only 7% of admissions in a year, but 24% of the population on a given day.

IDOC Admissions 2010-12, by felony class: 70,180 total admissions

IDOC Population on June 30, 2012, by felony class: 48,052 inmates
